VISUALLY EDITED DATA ITEMS FOR 2007 DATA CHANGES

- * Currently, these eight (8) data items will be tracked only. Six of these items are related to new multiple primary and histology rules. Class of Case and Grade have been added as visually edited items based on discrepancies on audits. Feedback will be provided to facilities for these items. They will be counted in the accuracy rate beginning in January 2008.
- ** Computed from procedure fields
- *** Computed from the three procedure fields and treatment hospital number

General Notes:

Note 1) Date of Diagnosis must be used during visual editing for both the Extent of Disease fields and for the Collaborative Staging fields, and surgery and radiation therapy data items. The surgery codes have changed for many of the sites and new and old values are not comparable. Although there is comparability between old and new radiation therapy data items, only Date of Radiation (all years), Radiation Therapy Summary (for cases diagnosed prior to 1/1/03) and Radiation-Regional Treatment Modality Summary and Radiation Regional Boost Modality Summary (for cases diagnosed 1/1/03 forward) will be visually edited for accuracy.

Note 2)

For cases diagnosed prior to 1/1/2003, there are no surgical procedure fields transmitted to the CCR for the 98-02 surgery data items. Only the summary fields are transmitted. Text will be available for all of the procedures performed and will be used by the visual editor to edit these summary fields.

Note 3)

For cases diagnosed 1/1/2003 forward, the summary fields will be visually edited instead of the three procedure fields for Date of Surgery, Procedures 1-3, Surgery of the Primary Site, Procedures 1-3, Scope of Regional Lymph Node Surgery, Procedures 1-3 and Surgery of Other Regional/Distant Sites, Procedures 1-3.

Note 4)

For cases diagnosed 1/1/04 forward, both the surgery summary fields -- and hospital fields -- Surgery of the Primary Site At This Hospital, Scope of Regional Lymph Node Surgery At This Hospital and Surgery of Other Regional/Distant Sites At This Hospital -- will be visually edited.
