**CALIFORNIA CANCER  
REPORTING SYSTEM:**

**PATIENT INFORMATION**

## What is the California Cancer Registry?

Every state has a cancer registry, and the California Cancer Registry (CCR) is California's cancer tracking system. CCR has collected information about cancer in California since 1988 and is part of the California Department of Public Health.

## It is the law in California that all cancer cases be reported to CCR.\*

CCR collects information about cancer in California. Information is used to learn more about new cancer cases, cancer treatment, cancer screening programs, and cancer outcomes.

Health care providers, hospitals, and cancer treatment facilities are required by law to submit report of cancer diagnoses and treatment to CCR.

## Cancer research is important.

Every person in California benefits from cancer research. With the help of people like you, hundreds of research studies using CCR information have helped us understand the causes of cancer, and improve cancer treatment and outcomes.

## Why collect cancer cases?

Cancer cases are collected to monitor the number of new cancer cases, track cancer outcomes, respond to public concerns, and to invite people to join research studies.

## Your information is safe.\*\*

Information about cancer patients is kept private and secure. Outpatient information is protected by law. Researchers may ask you to join a study. They never share names or personal details with others.

## You may be invited to join a research study.

If researchers have approval from the California Committee for the Protection of Human Subjects, they can use your record to contact you to join a research study. The California Committee for the Protection of Human Subjects protects you by reviewing research activities.

## Your Rights.

You do not have to join a research study. Medical care and cancer treatment will not be affected if patients do not want to take part in a research study.

You may report any concerns about cancer research to the California Committee for the Protection of Human Subjects. You can contact CCR and ask that your contact information not be shared with researchers.

## Where can I go for more information?
