Timeliness Reports

Eureka version 15.0, which allows transmission of cases diagnosed in 2016 is unfortunately delayed due to the delay in releasing specifications by the standard setters, SEER, NPCR and NAACCR. Therefore, The CCR has suspended the timeliness of reporting standard through December 31, 2016. CCR will re-assess timeliness compliance at that time and make a decision on when to re-implement the timeliness reports.
