Data Alert - Registrar  
2016-043

## Timeliness Report

Due to the delay in releasing 2016 specifications by standard setters (SEER, NPCR, and NAACCR) and the impact on software vendors to release their 2016 software versions, the CCR will temporarily suspend the timeliness of reporting standard through **February 28, 2017**. This will apply for cases with a year of diagnosis of 2016 AND the number of months between date of last contact and date case received is greater than 6 months.

*NOTE: A previous Data Alert indicated that Timeliness would be suspended through December 31, 2016. The date has since been re-evaluated and extended through February 28, 2017 per the above criteria.*

November 28, 2016
