Hematopoietic Stand-alone Database Updated
Released February 4, 2015

The Hematopoietic stand-alone database, has now been updated and posted on the SEER website. Click on the SEER link below to download the Hematopoietic & Lymphoid Database Software:

https://seer.cancer.gov/tools/heme/download

New features and capabilities in the stand-alone version:

- SEER has added the ability to update the data in the stand-alone version of the Heme database in a more automated fashion.

- Here's how it works: each time the user's computer has an internet connection, it will automatically check to see if there is new Hematopoietic data, and download it when there is new data.

- For those who use the stand-alone version, you will now get newly published data automatically when you connect to the internet.
