Data Alert
DA 2013-006

As a reminder, all software vendors in California must receive Vendor Approval prior to registrars upgrading to their latest software version. To date, the CCR has not approved any 2013 cancer reporting software.

Therefore, **DO NOT** upgrade to the 2013 cancer reporting software until notification from CCR that abstracting software vendor has been approved. We are currently waiting for an updated NAACCR edit Metafile and will proceed with vendor approvals once that is received. The CCR will send out data alerts notifying facilities of individual vendor software approval. The CCR anticipates accepting cases diagnosed 2013 in NAACCR version 13 on June 3, 2013.
