DATA ALERT

DA 2011-002

Abstract Generator Tool For CSv02.03.02 Now Available

The abstractor generator tool for CSv2, which was developed by IMS, has been updated to version 02.03.02.

It is at the bottom of this web page:
<http://www.cancerstaging.org/cstage/>

Or, go directly to the SEER web site:
<http://www.seer.cancer.gov/tools/absgenerator/>

The program will generate a WORD document for each schema based on primary site, histology and SSF 25 (when applicable). These documents can be saved on your computer. You must have WORD 2003 or later to run this tool. Remember to change the file name before saving.

This tool can be used by hospital registrars who are ready to start abstracting 2011 cases and have not received the upgrade to version 02.03.02 software.
