Appendix Q: Index to Site-Specific Data Items (SSDI's)

A Site-Specific Data Items (SSDI's) is based on primary site, AJCC chapter, the EOD schema, or the Summary Stage schema. SSDI's have their own data item name and number and can be collected for as many sites, chapters, and/or schemas as needed. Each Site-Specific Data Item (SSDI) applies only to selected schemas.

NOTE: The Grade data items listed below are required for ALL schemas. Therefore, they are NOT included in Appendix Q. See [Volume I](#) for information and coding instructions for:

- Grade Clinical
- Grade Pathological
- Grade Post-Therapy

How to Read Appendix Q:

IMPORTANT: All CCR required data fields are to be included in transmits to the CCR.

- An X in the CCR box indicates the data item is required by the CCR from **ALL** facilities (Non-CoC and CoC facilities).
- An X in the CCR box with the condition "**CoC Facilities Only**", indicates the data item is required from CoC facilities **only**, and are not required by Non-CoC facilities.
- CoC facilities should refer to the [STORE Manual](#) for coding requirements related to individual SSDIs.

Coding Guidelines:

- CoC facilities – CoC Accredited Flag coded 1
 - For all SSDIs, required and non-required by the CCR blank or 8 (X.8, XX.8, etc.), is not allowed (an edit will fire). A valid value must be entered. Use 9 (X.9, XX.9, etc.) if no information available for that SSDI.
- Non-CoC facilities and CoC facilities with CoC Accredited Flag coded 2
 - If an SSDI is not required by the CCR then 8 (X.8, XX.8, etc.); 9 (X.9, XX.9, etc.), or blank is allowed.
- Non-CoC facilities who chose to voluntarily collect CoC required SSDIs:
 - Code per medical record information and follow all appropriate coding instructions and guidelines outlined in the SSDI manual.

NOTE: Code and supporting text for CCR required/or CoC only SSDI's may be reviewed by Visual Editing QC staff during customary random selection; any coding discrepancies which may be identified will be counted.

SSDI's are organized alphabetically by:

- Cancer Schema

- Identification table, which includes the following reference items:
 - AJCC ID
 - Schema ID
 - Schema ID Description
 - Site Codes
 - Histology Codes
- Requirement table for the CCR and CoC to capture the following items:
 - Site-Specific Data Items (SSDIs)
 - Schema Discriminators 1-3
 - SEER Site-Specific Factor 1

NOTE: See [Volume I](#), for additional information and coding instructions for SEER Site-Specific Factor 1, HPV status.
