

Registrar's Check List for 2010 Data Change Implementation

- ✔ Complete abstracting 2009 cases in current software version.
 - ✔ Do not abstract 2010 cases in current cancer reporting software.
 - ✔ Abstract 2008 death clearance cases using the 2009 software version.
 - ✔ Complete processing 2008 death clearance cases prior to installing the 2010 software version.

- ✔ Attend CSv2 training offered at various locations throughout the state.

- ✔ Download CSv2 manual when available from www.cancerstaging.org.

- ✔ Listen to the thirteen (13) Hematopoietic and Lymphoid Neoplasm Project recorded webinars on the SEER web site (<http://www.seer.cancer.gov/registrars/>).

- ✔ Download and install the Hematopoietic Database available on the SEER website.

- ✔ Download and install SEER*Rx, Version1.4.1 available on the SEER website.

- ✔ Review 2010 Casefinding List available on the SEER website, noting new reportable histologies. The 2010 Casefinding List will be incorporated into Vol. 1 Appendix K. The SEER 2010 case finding list is located at <http://seer.cancer.gov/tools/casefinding/fy2010long.html>.

- ✔ Apply the CS Edits Review edit set available through your software vendor. This edit set will be used to identify cases to be corrected before applying the conversion to CSv2.
