SEER SINQs

Subject: Finalized SEER SINQs June-September 2015

Finalized SEER SINQs from June-September 2015 have been posted to the California Cancer Registry (CCR) website under SEER Inquiry System (SINQ). Please click [here](#) for additional details.

Important Highlights Include:

- 20150039 instructs if a squamous cell carcinoma, signet ring cell type of the skin is reportable
- 20150034 advises how to code histologies with neuroendocrine differentiation
- 20150029 informs when to code Prednisone as treatment

These Finalized SEER SINQs were compiled and nicely formatted by the Cancer Registry of Greater California (CRGC), one of the three Regional Registries in California.
