Data Alert – 2022-23
Reportability of AIN II, VIN II, and VAIN II and
Volume I, Errata Revision - 2022

Per SEER SINQ [20220025](#) AIN II, VIN II, and VAIN II **are reportable** for 2021 and forward based on ICD-O-3.2. However, the CCR requires these cases be included for 2022 casefinding. **There is no expectation by the CCR to go back and perform casefinding for 2021 to identify these cases.**

A revised errata for the twenty-second edition of the California Cancer Reporting System Standards, [Volume I: Abstracting and Coding Procedures for Hospitals](#) has been published reflecting this update for 2022.

Errata revisions include Volume I pages:

- II.1 CCR Reportability Guide – Reportable
- V.3.3.1 In-Situ Coding
- V.8 Terms Indicating In-Situ for Staging

The Errata document is located on the [Register Resources and Reporting](#) page under Volume I – 2022.
