Data Alert – 2026-16
New CCR “Q-Tip” Posted to FLccSC
Brain Primary Tumor Location

This Q-Tip provides coding tips and clarifications for the SSDI **Brain Primary Tumor Location**, which is collected for Brain Stem tumors to distinguish between tumors which arise in the Pons vs other subsites within the Brainstem.

Clinically, information regarding the Pons is very important, especially in pediatric cases since the Pons is the third most common site for pediatric brain tumors.

The new Q-Tip can be found in FLccSC under the Course Category “CCR Q-Tips.” Once you open the course category, “enroll” in the course “Q-Tip Series – Brain Primary Tumor Location.”

If you do not have a FLccSC user account, use the link below to access the FLccSC login page and click the box “New Users – Register here” in the bottom right-hand corner and set up your profile.
