Data Alert – Vendor 2022-05
NAACCR XML - Transmit File Size

Transmitted NAACCR XML new case data files and modified record data files must be limited to a maximum of 2,097,152 bytes each to prevent any one overly large file upload from holding up other file uploads in the central system.

This will be reflected in the next release of the [California Cancer Reporting Standards Volume II-2022](#) to be updated soon.
